

Mauricio Basalo Gutierrez

Web Developer

During the pandemic, I found the love of my life and within months, I left urban life to move with her to the countryside. I went from being in the city center, active for 12 hours a day, to being a novice explorer of the rural world. It was a dream years in the making, but it also involved learning to live in a completely different environment, requiring a drastically different skill set.

My wife, a technology expert, introduced me to this vast universe, so in order to understand her passion a bit better, I started researching. Soon I was learning HTML to start with and boom!, I was hooked. Since then I have been continuously expanding my knowledge in tech, both on my own and academically, and am now actively looking for an opportunity at a dynamic company to kick off my career in this field and contribute to its success by applying what I have learned so far while continuing to expand my knowledge.
